SUMMARY

Hello, I am a graduate of Telkom Malang Vocational School majoring in Software Engineering who is currently studying at Bina Nusantara University majoring in Information Systems. I master the Javascript programming language and usually use the NodeJS and Express frameworks.

I have 1 year of work experience in SIMTEK (Simbiotik Innovation Technology) in the field of Software Developer. As a software developer there, I worked on several projects, namely developing the company's website using Laravel, developing the frontend (Next JS) and backend (Nest JS) of the Naga Exchange application Dashboard, and most recently being the Backend Developer of the hospital Dashboard project using Express JS.

In 2021, I have internship experience at PT Artha Elektronika (EzyPay) for 3 months as a software engineer there I helped develop the web from the utter academy with the PHP programming language and the CodeIgniter framework

WORK EXPERIENCE

PT Simbiotik Innovation Technology (SIMTEK) – Tangerang, Banten, Indonesia
Software Engineer (August 2022 - SEPTEMBER 2023) Fulltime

- Develop simtek websites using the Laravel framework.
- Develop dashboard website for Naga Exchange application admin using Next JS for Frontend and Nest JS for Backend.
